

Fleet Monitoring Services

Automated Inventory Protection from Safety-Related Recalls

It only takes
ONE
recalled
vehicle
in your
fleet to...

bring operations to a halt

put your drivers at risk

cause a deadly accident

slip through the cracks

harm your brand reputation

cost you millions in a law suit

put you out of business

HINT:
DON'T LET
THIS
CAR LEAVE
YOUR FLEET!

PROACTIVE
recall management
is the only solution

VIN-Specific Recall Check

- Ensure drivers do not operate vehicles that pose a safety risk
- Reduce liability with daily reporting
- Safeguard your brand and your staff
- Receive timely recall updates issued by manufacturers
- Check for recalls before assigning inventory for resale

Recall Reporting & Alerts

- Check recall status daily
- View comprehensive details of every recall that applies to a specific VIN, not just a year/make/model range
- Identify all open recalls scored by safety risk
- Obtain “estimated repair time” and parts availability to plan vehicle “out of service” schedule
- Track and manage new and previously identified recalls in inventory
- Notify drivers if the vehicle in their possession has been recalled

Mobile App Recall Lookup

- Discover recalls instantly on the lot
- Save time with windshield VIN-scanning technology

Integrated and Standalone Service Delivery Options

- Easily integrate with your existing fleet management system and mobile apps
- Choose real-time API (individual VINs), FTP Batch upload (multiple VINs) or programmatic uploads via SFTP
- Monitor batch processing status and recall reporting online
