Rental Agency Fleet Monitoring

RecallMasters

Recall Masters protects your brand, customers and bottom line from the potential disaster of overlooking just one recalled vehicle in your fleet. With the enactment of the U.S. DOT's Safe Rental Car Act, federal law prohibits most fleets from renting/leasing/selling vehicles with open recalls, imposes stiff penalties for violators and triples the cap on civil penalties to $105 million.

Gaining compliance with federal law begins with Recall Masters, empowering successful car rental agencies with a suite of proprietary software and recall knowledge. Seamlessly integrated into your existing systems, perform a daily check of all VINs to plan inventory availability. Recall Masters has you covered with protection from the automotive industry's foremost authority in vehicle recalls.

Solution Components Include:

VIN-Specific Recall Check

- Ensure no car leaves your lot with an open recall
- Reduce liability with Safe Rental Car Act compliance
- Protect your brand and ensure your customers' safety
- Receive timely recall updates issued by manufacturers
- Check for recalls before remarketing inventory

Recall Reporting & Alerts

- View comprehensive details of every recall that applies to a specific VIN, not just a year/make/model range
- Obtain "estimated repair time" and parts availability to plan "out of service" schedule
- Track and manage new and previously identified recalls in inventory
- Monitor batch processing and recall reporting online

Integrated and Standalone Service Delivery Options

- Easily integrate with your existing rental fleet management system
- Check individual VINs via real-time API or multiple VINs via FTP or SFTP batch upload
